

MOYINOLUWA OSO

DATA ANALYST

osoworkmail00@gmail.com | Nigeria
<https://pmo-portfolio-three.vercel.app/>

PROFESSIONAL SUMMARY

Data analyst and problem solver with a B.Sc. in Computer Science and hands-on experience turning structured and unstructured data into actionable insights, dashboards, and practical solutions. Skilled in SQL, Python, Power BI, Excel, data cleaning, exploratory analysis, and business intelligence. Interested in using data, technology, and analytical thinking to understand problems, improve processes, and support better decisions.

CORE SKILLS

- **Analytics & BI:** Power BI (Dashboard Development, DAX, Power Query), Microsoft Excel (PivotTables, Power Query, Advanced Excel), Google Sheets, KPI Tracking, Data Cleaning & Validation, Data Quality Assurance, Exploratory Data Analysis
- **Programming & Data Analysis:** SQL, Python (Pandas, NumPy, Plotly, BeautifulSoup), SQLite, Jupyter Notebook
- **Administrative & Operations:** Document Management, File Organization, Scheduling & Calendar Coordination, Report Preparation & Automation, Meeting Support, Presentation Formatting (PowerPoint, Canva)
- **Finance & Client Support:** Intuit/QuickBooks, Client Billing & Payment Processing, Financial Record Reconciliation
- **Tools & Platforms:** Microsoft Office Suite, Google Workspace (Docs, Sheets, Drive), Canva, AI Productivity Tools

PROFESSIONAL EXPERIENCE

Data Analyst & Administrative Support - 2 Division Nigerian Army, Ibadan, Nigeria

Jan 2025 – Dec 2025

- Designed and automated Excel reporting templates, reducing manual reporting time by 25%.
- Cleaned, validated, and prepared datasets across multiple departments, improving data accessibility and reporting consistency.
- Conducted data quality checks and resolved reporting discrepancies to support accurate operational reporting.
- Standardized reporting and digital workflow processes while supporting documentation, presentations, and staff training.

Finance & Administrative Intern - Cedar Care, United States (Remote)

Sept 2024 – Nov 2024

- Managed and processed client payments and financial transactions using Intuit accounting software, ensuring accuracy and timely recording of all entries.
- Maintained organized financial records and reconciled client payment data, supporting a clear and auditable transaction history.
- Gained practical exposure to U.S. financial operations, administrative controls, and compliance practices within a remote professional environment.

KEY PROJECTS

PMO's Apparel - Financial Performance Dashboard | Excel · Power Query · PivotTables · Dynamic Formulas

- Built an interactive financial dashboard tracking ₦2.19B revenue, ₦1.10B expenses, and 49.9% profit margin across products and periods.
- Developed dynamic KPI insights and year-over-year analysis to support financial performance reporting.

Retail Transaction Analytics Dashboard | Excel · PivotTables · Power Query · Data Cleaning

- Cleaned and analyzed a 3,000-transaction retail dataset, building a multi-page Excel dashboard to monitor revenue, product performance, regional performance, and quarterly trends across 2024–2025.
- Identified Personal Care as the top-performing category (₦3.54M) and surfaced quarter-over-quarter revenue trends, supporting data-driven merchandising and regional performance conversations.

HR Workforce Analytics Dashboard | Excel · PivotTables · PivotCharts · Power Query

- Built an Excel-based HR analytics dashboard analyzing workforce size, employee attrition, compensation, performance, and engagement across departments.
- Applied data cleaning, PivotTables, and interactive dashboard elements to identify workforce trends and surface areas requiring management attention.

FIFA 20 Player Analysis | Python · Pandas · NumPy · Exploratory Data Analysis

- Conducted a Python-based exploratory data analysis of FIFA 20 player data, examining performance ratings, potential, market value, age, club, and nationality trends across thousands of players.
- Applied data cleaning and statistical visualization techniques in Pandas/NumPy to surface value-vs-performance patterns, building hands-on Python proficiency alongside existing Excel/Power BI expertise.

Customer Churn Analysis | Python · Pandas · NumPy · Plotly · Jupyter Notebook · SQLite · Excel

- Built an end-to-end customer churn analysis in Python, combining customer, subscription, and support data to identify key factors associated with attrition.
- Analyzed churn by contract and plan type, churn score, customer satisfaction, and CLTV, and visualized monthly trends and subscription-source patterns using Plotly to support targeted retention strategy discussions.

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

- Data Science Fellowship, New Horizons Tech Hub - Developing proficiency in Python (Pandas, NumPy, BeautifulSoup) and SQL for end-to-end data science workflows (Jan 2026 – June 2026)
- Microsoft Power BI - Certificate of Completion, New Horizons Tech Hub (2026)
- Advanced Excel for Data Analysis - Certificate of Completion, New Horizons Tech Hub (2026)
- Microsoft Excel Specialist (2024)
- Ask Questions to Make Data-Driven Decisions - Google, via Coursera (2025)
- Foundations: Data, Data, Everywhere - Google, via Coursera (2024)
- IndabaX Nigeria 2026 Conference - Attendance & Participation, University of Ibadan (2026)

EDUCATION

B.Sc. Computer Science - Second Class Honors (Upper Division)

2020 – June 2024

Babcock University, Ilishan-Remo, Nigeria

LEADERSHIP & PROFESSIONAL AFFILIATIONS

- YALI Network (Young African Leaders Initiative) - Member (July 2026 – Present)
- Nigerian Society of Data Analysts and Business Intelligence Experts (NSDABIE) - Associate Member
- Class Governor, Victory Sanctuary Bible School, Lagos, Nigeria (Aug 2024 – Jul 2025)
- Media Lead, Legacy Youth Education Club, Nigeria (Jan 2024 - Aug 2025)
